Summary

Results-driven Database and Power BI Developer with 5+ years of experience in SQL Server, Power BI, ETL development, data modeling, and enterprise BI solutions. Proven ability to build, optimize, and performance-tune relational databases, deliver interactive Power BI dashboards, and transform complex multi-source datasets into actionable insights using DAX and Power Query. Experienced in requirements gathering, stakeholder communication, and process documentation within Agile environments. Strong background in financial reporting, forecasting, and business operations across 70+ countries, with a consistent track record of aligning technical solutions with strategic business objectives.

Experience

Othaim Group - Senior Power BI Developer Freelancer | February 2026- Present

- Delivered end-to-end BI solutions using Microsoft Power BI and Microsoft Fabric, supporting decision-making for CEO, CFO, and senior directors
- Developed complex SQL queries to extract and transform data from source systems into scalable dataflows
- Designed and optimized data models (fact, dimension, and bridge tables) enabling efficient relationships and high-performance reporting
- Translated stakeholder requirements into interactive dashboards with hierarchies, weekly drill-down, and bookmarks
- Built portfolio-level dashboards covering revenue, collections, sales performance, and forecasting metrics
- Implemented KPIs to track sales agents' performance and support financial planning and forecasting
- Conducted data validation and testing to ensure accuracy, consistency, and reliability across reports

Cloudy PropTech - Senior SQL & Power BI Developer | September 2024 - Present

- Delivered Power BI and SSRS dashboards providing executive, financial, and accounting insights.
- Enabled ERP-based financial reporting supporting revenue, forecasting, P&L, and cash flow analysis.
- Automate data workflows using reusable stored procedures to ensure scalability and maintainability.
- Built and maintained ETL pipelines using complex, highly optimized SQL queries to ensure accurate datasets.
- Utilized Power BI Dataflows and semantic models to standardize data transformation and support scalable enterprise reporting.
- Designed high-performance BI data models and automated workflows to improve reporting speed, and accuracy.
- Supported cloud ERP digital transformation initiatives for major real estate organizations in Gulf Area.

Aramex International - Global BI and SQL Developer | April 2023 - September 2024

- Developed complex SQL queries and scripts to extract, transform, and analyze data accurately and securely.
- Optimized performance of large-scale relational databases handling millions of records.
- Led ETL-driven data migration projects, ensuring smooth transformation and loading from multiple sources.
- Designed and supported Dynamic Power BI and SSRS reports.
- Troubleshoot and resolved integration and interface issues raised by stakeholders across 70+ countries.
- Participated in testing, code reviews, and technical documentation for sustainable solutions.
- Delivered training to new global team members and documented integration processes.
- Collaborated with cross-functional teams and maintained strong stakeholder communication and ownership.

Vodafone - Expert Resolution Specialist | June 2020 - April 2023

- Conducted data analysis to identify trends and improve customer experience.
- Assisted in the automation of reports and processes using SQL and Excel.
- Provided technical support and troubleshooting for enterprise systems.

Education	2018	BSc. in Mathematics and computer Science Ain Shams University
	2021	Business Intelligence Track Information Technology Institute (ITI) • Advanced SQL server Programming and Administration • Microsoft SQL Server Business Intelligence and Power BI • Introduction to Data Mining Algorithms, Big data, and cloud • Programming with C# and XML

Technical Skills

- **SQL & Database:** T-SQL, SQL Server, Query Optimization, Performance Tuning, Stored Procedures, Views, Functions, Data Warehousing, SSAS
- **Data Visualization:** Power BI, DAX, Power Query, SSRS, R, Python
- **Data Management:** ETL, SSIS, Data Modeling, Data Validation, Data Governance
- **Tools & Technologies:** Python, Docker, XML, Git, Azure Data Services
- **Business & Delivery:** Requirements Gathering, Stakeholder Engagement, Process Documentation, Agile/Scrum, Cross-functional Collaboration
