PROFILE

SQL Server and Power BI developer with **5+ years** turning ERP and operational data into reporting that leadership relies on. Writes production **T-SQL** (stored procedures, CTEs, window functions, performance tuning) and builds **Power BI** solutions end to end: star-schema models with fact, dimension and bridge tables, advanced DAX and time intelligence, Power Query, Dataflows and Power BI Service. Deep in **real estate ERP reporting** for Gulf clients, including Yardi Voyager lease financials, occupancy, aging, collections and ZATCA e-invoicing, plus global **logistics and e-commerce** data at Aramex. Works directly with CEOs, CFOs and finance teams, from requirements to validated, released reports.

CORE SKILLS

SQL	T-SQL, SQL Server, stored procedures, views, functions, CTEs, window functions, query optimization, performance tuning	Power BI	DAX, Power Query (M), Power BI Service, Dataflows, semantic models, time intelligence, TREATAS, HTML/Chart.js custom visuals
Data Modeling	Star schema, fact, dimension & bridge tables, many-to-many relationships, hierarchies, data warehousing	ETL & Platform	SSIS, ETL pipelines, data migration, SSRS, SSAS, Microsoft Fabric, Azure data services
ERP & Domain	Yardi Voyager (YSR), ZATCA e-invoicing, lease financials, occupancy, aging, collections, P&L, cash flow	Tools & Delivery	Python, Git, Docker, Power BI MCP, requirements gathering, UAT, documentation, Agile/Scrum

EXPERIENCE

Senior Power BI Developer (Freelance)

Feb 2026 – Present

Othaim Group **Retail & commercial real estate**

- Deliver end-to-end Power BI and Microsoft Fabric solutions supporting decisions by the CEO, CFO and senior directors.
- Built portfolio-level management dashboards covering revenue, collections, sales performance and forecasting.
- Designed and optimized data models with fact, dimension and bridge tables for efficient relationships and fast report performance.
- Wrote SQL to extract and transform source-system data into scalable Dataflows.
- Implemented sales-agent KPIs to track performance and support financial planning and forecasting.
- Turned stakeholder requirements into interactive reports with hierarchies, weekly drill-down and bookmarks.
- Validated report data against source systems to ensure accuracy and consistency across reports.

Senior SQL & Power BI Developer

Sep 2024 – Present

Cloudy PropTech **ERP for Gulf real estate**

- Deliver ERP-based financial reporting in Power BI and SSRS (revenue, forecasting, P&L and cash flow) for major real estate organizations in the Gulf.
- Built executive, financial and accounting dashboards connected directly to ERP data sources.
- Standardized data transformation with Power BI Dataflows and shared semantic models for consistent enterprise reporting.
- Write T-SQL for Yardi Voyager lease management reporting: lease financials, occupancy, aging, collections and LAF workflow status.
- Built ZATCA e-invoicing document logic in SQL, plus charge-type rules using window functions.
- Built ETL pipelines and reusable stored procedures that automate data workflows and keep datasets accurate.
- Designed high-performance data models that improved reporting speed and accuracy.
- Supported cloud ERP digital transformation initiatives alongside client finance and operations teams.

Global BI & SQL Developer

Apr 2023 – Sep 2024

Aramex International Logistics & e-commerce

- Delivered Power BI and SSRS reporting for global logistics and e-commerce operations, serving stakeholders in 70+ countries.
- Developed complex SQL queries and scripts to extract, transform and analyze logistics and e-commerce data.
- Optimized performance of large-scale relational databases handling millions of records.
- Led ETL-driven data migration projects, loading and transforming data from multiple source systems.
- Resolved integration and interface issues raised by stakeholders across regions.
- Contributed to testing, code reviews and technical documentation; trained new global team members.

Expert Resolution Specialist

Jun 2020 – Apr 2023

Vodafone Egypt

- Analyzed customer data to identify trends and improve customer experience.
- Automated recurring reports and processes using SQL and Excel.
- Provided technical support and troubleshooting for enterprise systems.

SELECTED PROJECTS

Real Estate Portfolio Analytics Model · Power BI

- Built and audited a Power BI model over tenancy, charges, aging and collection fact tables for a real estate client.
- Rewrote DAX measures, resolved date-table relationship conflicts for time intelligence, and added HTML KPI cards.

Financial Statements Workspace · Power BI Service

- Delivered P&L, balance sheet and occupancy dashboards; fixed date-dimension refresh failures caused by a hard-coded parameter and coordinated UAT with the client.

Interactive Power BI Visuals · HTML, Chart.js, DAX

- Built animated donut charts and tab navigation inside Power BI using HTML visuals driven by DAX measures.

EDUCATION

Business Intelligence Track

Information Technology Institute (ITI) · 2021
SQL Server programming & administration, SQL Server BI & Power BI, data mining, big data & cloud

BSc in Mathematics and Computer Science

Ain Shams University · 2018

LANGUAGES

Arabic Native
English Professional working proficiency
